

# INTRODUCING THE FIRST OF THE NEW X SERIES

Our vision from the start was to design and engineer our most advanced 20 tonne tracked excavator. In fact, our best ever.

Listening to customer demands, our engineering teams have obsessed over every minute detail of this world-class excavator.

Using automotive quality materials and proven components, our design is both rugged and refined.

The result is a machine to be taken seriously.

A machine to be trusted.

Anting Bamfond.

LORD BAMFORD, CHAIRMAN, JCB

## **EXTREME STRENGTH**

It's taken 4 years of hydraulic, electronic and electrical development and thousands of hours of extreme endurance testing, to build you a machine that doesn't just look extremely strong, it is extremely strong.

#### **EXTREME STRENGTH**

#### Tested to extremes.

1 Whole machine shaker rig used to replicate 15,000 hours of tracking and vibration.

1.1 million test cycles completed on our latest dig end which has been proven by over 10,000 machines across the globe.

Exhaustive testing on purpose built electronics and electric rigs to prove connections, layout and software.

**2** 30,000 window and door operation tests completed to prove components quality.

Hot and cold climate testing (55°C to -30°C) performed in controlled conditions and locations around the world.

#### **Exceptional build quality**

4 Proven undercarriage with fully-welded X frame construction for long-term durability with components supplied by industry-leading suppliers.

**5** SAE flange hydraulic fittings are extensively used to provide robust hose connections.

Rigid upper frame, flat revolver side skirts and double skinned doors with new plated hinges provide greater strength.

Extremely robust fold back mechanism for cab mirror.

Finite Element Analysis ensures longer life for key components.

2

## EXCEPTIONAL COMFORT

We've used ergonomic design, automotive quality materials and engineering excellence to deliver exceptional comfort. And with ride comfort and low noise to rival the best in the business, there's enough to make even the most demanding operator extremely happy.

#### **LOW NOISE**

Improved cab isolation using latest double cushion viscous mounts reduces vibration and noise into the cab. This helps deliver low in-cab noise of 68dB(A).

**EXCEPTIONAL COMFORT** 

#### **CUSTOMER LED ERGONOMICS**

Control layout reviewed and assessed by operators globally, with their feedback directly contributing to the final design.

#### Best operator environment.

Spacious JCB CommandPlus cab with high quality injection moulded interior. Industry-leading Grammer seat with wide, adjustable arm rests that reclines 145°.

New track pedal design with T-bars as standard with non-slip coating and optimised ergonomics.

- Joystick and switch controls are mounted to pods which are suspended from the seat and move with the operator for optimum control and less fatigue.
- Powerful new HVAC, with 11 targeted vents for optimum performance in hot and cold environments. Cool/heat box as standard.
- Industry standard isolator lever operation prevents accidental activation when exiting the cab.
- Spacious luggage tray behind operators seat with 3 independent 12V power supplies. Another handy storage space can be found at the back of the cab in the roof liner, including a hanger for the operator's helmet.
- Bluetooth radio is fully integrated into the control screen. USB and phone jack as standard.

## EXCELLENT CONTROL

4 years of hydraulic development combined with the latest Japanese components have delivered the very best balance of controllability and efficiency.

#### **EXCELLENT CONTROL**

#### Effortless working.

- 1 Latest generation Japanese hydraulics deliver precise and efficient control.
- Operator can select Auto-Stop and Auto-Idle depending on preference.
- Customisable proportional controls allow the operator to set their preference of speed and control of attachments.

New dozer option adds extra versatility.

Power boost button increases pressure by 10% for up to 9 seconds to provide extra tearout in tough conditions.

- Tracking speed can be found on the joystick for on the move tracking change, whilst a convenience button lets you configure a range of functions such as radio mute, camera cycle, or front screen wash.
- New slew drive provides high torque on acceleration and braking for greater controllability and refinement.

## EXTREMELY EASY

Using latest ergonomic design and with the help of customer and operator feedback, the new 210X and 220X have been designed to be easy to use and easy to transport making it easy to get more work done.

#### Best-in-class ease of use.

Start-stop button for ease of start-up means the operator doesn't have to turn the key to start it back up again. The start sequence also allows you to start digging within 2 seconds.

An intuitive menu navigation can be configured into multiple languages to suit most operators.

- Pipework shut-off taps now added as standard with SAE fittings, to enable quick connection of attachments when taking a hydraulic option.
- Easy quickhitch provides simplified operation with an override for removing large breakers or fork attachments.
- Advanced tool select system improves attachment handling by monitoring pressure and flow. There is tool storage as standard for up to 10 tools.
- E Machine lifting and transportation has been made easier due to dedicated lifting points and because the 210X and 220X are only 3.1m high, they can be transported on 900mm trailer beds which meets transport legislation (specification dependant).
- The cab includes mounts as standard to allow guards to be fitted in the field and also includes flat front glass for easy replacement.

## EXPERIENCE GREATER PERFORMANCE

We've invested 4 years of research and development and listened to 1,000 customers like you to build a machine that's ready to perform in the most extreme conditions; 55°C heat or freezing temperatures.

A machine that works with extreme efficiency on the demolition site or non-stop in the quarry.

#### **EXPERIENCE GREATER PERFORMANCE**

#### Best-in-class productivity.

- 1 Hydraulic pipes and hoses have a large diameter for increased productivity and efficiency. An innovative hydraulic regeneration system means oil is recycled across the cylinders for faster cycle times and reduced fuel consumption.
- Large diameter rotary coupling between the upper and lower structures provides better efficiency and productivity.
- 2.7m wide upper structure with a centrally mounted boom provides a centralised dig path and reduced slew bearing loading.
- 4 Auto-stop and Auto-idle on the JCB's EcoMAX Tier 4F / IV engine provides fuel saving of up to 5%. Machine cooling in 55°C heat with air conditioning running has been achieved with a bigger fan and engine mounted fan cowl for optimum airflow.
- For extra versatility, JCB offers a full list of auxiliary pipework options including hammer, merged pump flow, auxiliary, and low flow.
- Long reach and T.A.B. dig ends with low flow auxiliaries and lighting systems are also available.

# EXTRAORDINARY ATTENTION TO DETAIL

Building the new 210X and 220X involved a huge investment in state-of-the-art automotive style production facilities. We introduced new tooling, EPD coating, robot welding and established new relationships with many industry-leading suppliers to bring you not just great excavators but exceptional ones.

#### World-class finish.

All components are painted in house using a state-of-the-art paint facility to deliver a high quality finish that's checked for paint adhesion and coverage.

All machines undergo 1,232 validation checks including an intense hot test focusing on vibration, pressure and heat to replicate real-life applications.

- Significantly reduced vented and open areas means inherently stronger bodywork and reduced painted edges.
- Doors are bolted directly to the house frame and remain rust-free due to a zinc coating on all wear faces. All fasteners have a zinc finish (Geomet) for improved corrosion resistance, a new bolt and washer design protects paint from damage.
- New recessed counterweight design protects the rear end and machine branding from impact damage.

#### World-class assembly.

- E Robot welding of the dig end and undercarriage ensures consistent quality and accuracy.
- The slew ring is machined after manufacturing and welding to ensure a flat surface that reduces slewing noise.

**EXTRAORDINARY ATTENTION TO DETAIL** 

# EXTENDED SERVICE INTERVALS

The new 210X and 220X have been designed with greater productivity in mind and that means spending more time working and less time being serviced. Longer service intervals, quality parts and easy access to maintenance points all help to save you time and money.

#### **EXTENDED SERVICE INTERVALS**

#### Simple servicing.

- 1 Grouped greasing points make regular maintenance easier and quicker.
- Optional refuelling pump has an in-line fuel filter to protect the pump and engine.
- Ground level access to hour meter, HVAC filter, cab air filter and single fuse box. Optional LED convenience lighting for the service bay and upper structure.
- Bolt-on handrails and mirrors for easy replacement if damaged.
- **5** 2,000 hour engine air filter life achieved using a standard fit system with Powercore Nanofilter technology.
- Large cooling pack means more efficient cooling due to wider spacing fins which reduce clogging.
- A cover over the battery provides useful storage space in addition to the tool box.

### **EXCEEDINGLY SAFE**

At JCB we take safety very seriously and we make sure this forms an important part of the design process. So whether you're an operator, service engineer or site worker, we make working safer.

#### Safer working.

- The 210X and 220X boast anti-slip surfaces and comfortable, well positioned grab handles and an area free of tread plate dimples to allow for kneeling during servicing.
- Flattest, safest operator access to the top of the machine with built in kick strips around the edges.
- Optional twin or 360° cameras helps operators operate safely.
- Operator safety is paramount to JCB and the optional dipper limiter can be configured through the display to avoid a cab strike.

### **EXTRA SUPPORT**

In a world of tough business decisions where the customer rightfully expects the very best in machine back up and a complete package of value added solutions, JCB delivers. Whatever you need and wherever you are, JCB's worldwide customer support is truly first-class.

#### Machine efficiency.

By providing information like idle time monitoring and fuel consumption, JCB LiveLink saves you money and improves productivity.

#### Machine reliability.

Accurate hours monitoring and service alerts improve maintenance planning and help rental companies with accurate charging. Technical alerts 

Curfew alerts inform you of unauthorised usage. your machines.

#### Machine monitoring.

Keep track of what your machine's been doing throughout the day with regular performance reports accessed via the LiveLink website.

#### Machine security.

LiveLink's real time geo-fencing alerts tell you when machines move out of predetermined zones. recover stolen machines and tackle fuel theft.

Dealers

Parts Distribution Centres

- 1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.
- The global network of JCB Parts Centres is another model of efficiency; with 16 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.

Note: JCB LIVELINK and JCB ASSETCARE may not be available in your region, so please check with your local dealer

ENGINE	
Model	JCB EcoMAX Tier 4 Final / IV.
Туре	4 stroke, 4 cylinder in-line, direct injection, turbocharged diesel.
Rated power (net)	129 kW (173 hp).
Piston displacement	4.8 litres.
Air filtration	Dry element with in cab warning indicator.
Starting system	24 volt.
Batteries	2 x I2 volt.
Alternator	28 volt - 100 ampere.
Maximum torque	690 Nm @ 1500 rpm.
Bore and stroke	106 x 135 mm.

SWING SYSTEM	
Swing motor	Axial piston type.
Swing brake	Hydraulic braking plus automatic spring applied disc type parking brake.
Swing torque	68.7 kNm.
Swing speed	II.0 rpm.
Swing gear	Large diameter, internally toothed fully sealed grease bath lubricated.
Swing lock	Switchable brake in cab.

TRACK DRIVE	
Туре	Fully hydrostatic, two speed with autoshift.
Travel motors	Variable swash axial piston type, fully guarded within undercarriage frame.
Final drive	Planetary reduction, bolt-on sprockets.
Service brake	Hydraulic counter balance valve.
Park brake	Disc type, spring applied, automatic hydraulic release.
Gradeability	70% (35°) continuous.
Travel speed	High – 5.7 km/h.
	Low - 3.2  km/h.
Tractive effort	207.5 kNm.

SERVICE CAPACITIES		
Fuel tank	Litres	387
Engine coolant	Litres	38
Engine oil	Litres	20.4
Swing reduction gear	Litres	8
Track reduction gear (each side)	Litres	3.5
Hydraulic system	Litres	250
Hydraulic tank	Litres	120
DEF fluid	Litres	47.7
